

Learner Identification Methodologies

Learner is identified as slow or fast on the basis of...

- Performance in previous examination
- Oral informal question-answering
- Discussion during teaching hours
- Scores in the tests conducted at the beginning of academic year

After the identification of learner type, the institute organizes special programs for both slow and advanced learners to update their knowledge and skills.

Criterion for Learners' Identification

Students securing less than 50% marks in the previous exam are identified as slow learners and those securing more than 75% marks are identified as fast learners.

Marks of previous exam	Learner Type
< 50 %	Slow Learners
50-75 %	Average
>75 %	Advanced Learners
