Block filter avoidance apps
Drops traffic from applications that tunnels other apps, proxy and tunnel apps, and from apps that can bypass firewall policy. These applications allow users to anonymously browse Internet by connecting to servers on the Internet via encrypted SSL tunnels. This, in turn, enables users to bypass network security measures.
Block generally unwanted apps
Drops generally unwanted applications traffic. This includes file transfer apps, proxy & tunnel apps, risk prone apps, peer to peer networking (P2P) apps and apps that causes loss of productivity.
Block high risk (Risk Level 4 and 5) apps
Drops traffic that are classified under high risk apps (Risk Level- 4 and 5).
Block peer to peer (P2P) networking apps
Drops traffic from applications that are categorized as P2P apps. P2P could be a mechanism for distributing Bots, Spywares, Adware, Trojans, Rootkits, Worms and other types of malwares. It is generally advised to have P2P application blocked in your network.
Block very high risk (Risk Level 5) apps
Drops traffic that are classified under very high risk apps (Risk Level- 5).
