Activity No. 1

Name of Activity: Talk on Reading Habit among Students on 'National Librarian Day'

Date of Activity: 12-08-2023

Number of Students: 21

Description: The department of Library and information Science organized a special lecture on National Librarians' Day in India. It was conducted on **August 12th** to honor the invaluable contributions of librarians in the field of education, knowledge sharing, and information dissemination. The resource person was Dr. Harvinderjit Singh, Assistant Professor & Head, Department of Library & Information Science. The date marks the birth anniversary of **Dr. S.R. Ranganathan**, a renowned Indian mathematician and library scientist, who is often referred to as the **Father of Library Science in India**. Dr. Ranganathan's pioneering work laid the foundation for modern library science in the country, and his Five Laws of Library Science have had a lasting impact on library practices worldwide. The observance of National Librarians' Day serves to recognize the critical role librarians play in facilitating access to information and promoting literacy. It acknowledges their efforts in managing library resources, curating collections, and ensuring that people from all walks of life have access to knowledge, education, and culture.

Activity No. 05

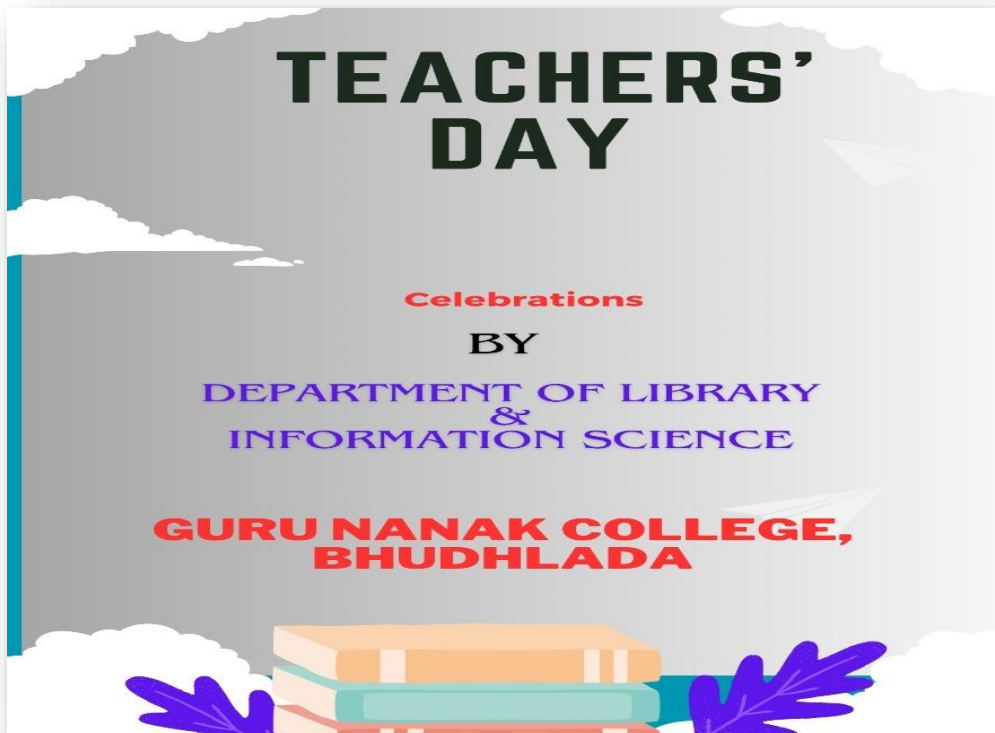

Name of Activity: Special Lecture on Information and Literacy and skills on Life Long Learning

Nature of Activity:

Date of Activity: 05-09-2023

Description: The Department of Library & Information Science organized a special programme to celebrate the **Teachers' Day**. This day marks the birth anniversary of **Dr. Sarvepalli Radhakrishnan**, the second President of India, philosopher, and educator, who believed that teachers should be revered and respected for their role in nurturing young minds and imparting knowledge. The resource person for the programme was Dr. Inderjeet Singh, Assistant Professor, Department of library & Information Science. Sir told that the celebration of Teachers' Day serves as an occasion to express gratitude and appreciation for teachers' dedication, hard work, and influence in the lives of students. It is a day when students across the country come together to show their respect for their teachers through various activities, including giving gifts, writing messages, and organizing events such as cultural programs and performances.

Activity No. 15

Event type: -Expert Lecture

Event Name:- Winter Diet and lifestyle according to Ayurveda

Speaker:- Dr. Gaganpreet Kaur

Date:- 16 December 2023

No. Of participants:- 140

Description:- An Expert Lecture was organised by the Department of Computer Science, English and Food Processing on the topic "Winter Diet and Lifestyle according to Ayurveda" on 16 December 2023. The keynote speaker was Dr. Gaganpreet Kaur B.A.M.S. (Punjab), PGAP (NIA, Jaipur), BCTA (NIA, Jaipur), CMS (ADF). Vice principal Dr. Rekha Kalra was also there. Other faculty members and 125 students were there to attend this lecture.

Impact:- The keynote speaker said that Ayurveda emphasises balance and harmony with nature. In winter, Ayurveda recommends adjusting diet and lifestyle to pacify the Vata dosha, which tends to be aggravated during this season. Warm, nourishing foods, herbal teas, and oil massages are suggested to maintain balance and support overall well-being. Additionally, staying hydrated and incorporating grounding practices, such as yoga and meditation, can help.

The poster features a background image of fresh ginger, turmeric, and a bowl of orange-colored soup. Text elements include:

विषय सामाजिक जीवन में आध्यात्मिक भावना का महत्व

विवरण विद्यार्थी जीवन में आध्यात्मिक भावनाओं का बहुत महत्व है। तकनीकी युग में भूमंडलीकरण और बाजारवाद ने मानव के रोजमर्रा जीवन को ही प्रभावित नहीं किया बल्कि उसकी संवेदना को भी समाप्त कर दिया है। विद्यार्थियों को आध्यात्मिक भावना का महत्व बताते हुए उसके उचित उपयोग पर व्याख्यान दिया गया।

वक्ता. डॉ - गुरजीत कौर

हिन्दी विभाग

गुरु नानक कॉलेज बुढलाडा ,

तिथि , फरवरी 8 – 2024

उद्देश्य विद्यार्थियों को - जीवन में सर्वगुण संपन्न बनाने के लिए सामाजिक व राजनितिक पहलूओं को ध्यान में रख आध्यात्मिक भावना की ओर प्रेरित किया ताकि वह एक अच्छा जीवन जी सके और कल्याणकारी समाज का नींव रख सकें।

Meditation:

Meditation has been shown to offer many benefits. Although it's well known as a technique to reduce stress and anxiety, research shows that it may also help enhance your mood, promote healthy sleep patterns, and boost cognitive skills.

Meditation is the habitual process of training your mind to focus and redirect your thoughts. The popularity of meditation is increasing as more people discover its many health benefits. You can use it to increase awareness of yourself and your surroundings. Many people think of it as a way to reduce stress and develop concentration. People also use the practice to develop other beneficial habits and feelings, such as a positive mood and outlook, self-discipline, healthy sleep patterns, and even increased pain tolerance.

There are five health benefits of meditation.

1. Reduces stress
2. Controls anxiety
3. Promotes emotional health
4. Enhances self-awareness
5. Can decrease blood pressure

Activity No: 27

Name of Activity: How to keep your body fit and Mind healthy

Nature of Activity: The department of Library & Information Science, organized a special lecture on , “ How to keep your body fit and mind healthy”. The lecture was delivered by Assistant Professor Dharminder Singh. Sir told that maintaining a healthy body and a sharp mind is essential for leading a fulfilling and productive life. Achieving this balance requires a combination of physical activity, mental exercises, proper nutrition, and lifestyle choices. Here are some key practices to keep your body fit and your mind health. Engage in activities like walking, jogging, cycling, swimming, or strength training for at least 30 minutes a day, five times a week. Physical exercise helps maintain cardiovascular health, builds strength, improves flexibility, and boosts energy levels.

Activity No. 03

Name of the event – Graphic design presentation

Date of the event – 11/08/23

Name of the speaker – Assistant Prof. Kiranpal kaur

Number of students participate - 45

Description-

The Assistant Professor of Graphic Design recently organized an engaging and informative activity aimed at enhancing the students' creative skills and industry knowledge. The event, titled "Design Thinking: From Concept to Creation," focused on guiding students through the design process, from brainstorming and conceptualization to the final execution of graphic design projects. The activity involved a series of hands-on workshops where students were encouraged to work collaboratively, applying theoretical concepts to real-world scenarios. The Assistant Professor led the students through various aspects of graphic design, including typography, color theory, and digital design tools, ensuring each participant had the opportunity to explore their own creative approach. Additionally, guest speakers from the design industry shared insights into current trends, challenges, and opportunities in the field, providing students with valuable industry perspectives. This event not only helped students improve their technical skills but also fostered teamwork and problem-solving abilities. Through interactive sessions, participants were able to develop a deeper understanding of the design process and gain practical experience in creating professional-level designs. Overall, the activity proved to be a great success, leaving students inspired and motivated to further pursue their passion for graphic design.

NOTICE

Department of Science

It is informed to students that on **11 August 2023**, an activity will be organised on topic to "**Graphic Design**", by **Assistant Prof. Kiranpal Kaur** in which students get knowledge about usage of basic design by using Canva, so all the students are informed to reach at 11.00am in "Computer lab no 1".

Orientation

Introduction

On our first day in Borawal village, which is situated in Mansa district, we had the pleasure of meeting our faculty members. They provided us with a comprehensive introduction to the Rural Agricultural Work Experience (RAWE) Program. This program consists of seven units that we had formed during our time in the village. These units are designed to give us hands-on experience and practical knowledge in various aspects of agriculture and rural development.

- > Village survey
- > Agronomical Intervention
- > Plant Protection Intervention
- > Soil Improvement Intervention
- > Fruit and Vegetable production Intervention
- > Food Processing Intervention
- > Animal Production Intervention
- > Extension and Transfer of technology

Village Survey

In our village survey we visited Borawal village and get information from farmers about family, land holding, irrigation, agronomic interventions etc. in our village survey we filled a Annexure provided for our RAWE by Punjabi University Patiala.

Agronomical Intervention

In Agronomical Intervention I had performed demonstration on mechanization in agronomical practices and comparison with local practices. In my demonstration I had given information of modern and traditional agronomical practices and difference between traditional and modern agronomical practices.

Village Attachment

DETAIL OF VILLAGE

The Borawal village is located in Mansa, Punjab. The village has geographical area of 11.55 km square. The Mansa is the district of this village with Pin code of 151502 and state code of PB. participate in their implementation. The students would be given rigorous orientation and familiarization on various issues and problems expected on farmers' field and hence would gain competence and confidence for solving problems related to agriculture and allied sciences. It would be implemented in adopted villages under the supervision of scientists. Activities designed are mainly focused on intensive observations/analysis of socioeconomic and technological profile of the farm families in rural areas, participatory extension approach and acquaintance with farming situations, farm practices and interaction with progressive farmers. Soil testing has become the integral part of RAWE. The RAWE program.

The students will also gain the first hand information about technologies adopted by farmers and RAWE also help the students to prioritize the farmers problems, prepare village development plans and to develop skills and attitude of working with farm families for overall development in rural area. The timings for RAWE proposed coincide with the main cropping season.

Main objectives of RAWE

- To provide an opportunity to the students to understand the rural setting in relation to agriculture and allied activities.
- To make the students familiar with socio-economic conditions of the farmers and their problems.
- To impart diagnostic and remedial knowledge to the students relevant to real field situations through practical training.
- To develop communication skills in students using extension teaching methods in transfer of technology.
- To develop confidence and competence to solve agricultural problems.
- To acquaint students with on-going extension and rural development program.
- Programme of work

Plant Protection Interventions

Demonstration of Preparation of Organic Input (NEEM EXTRACT)

Organic input

Organic inputs are derived from the processing of plant and animal products that the farmer brings to his crop in order for it to express its production potential. By decomposing and fermenting, organic materials from the farm or outside allow organic inputs to form. Plants inputs are, derived from plant decomposition they include compost, pruning residues, organic preparations such as extract, oilcakes etc.

Animal inputs are derived from livestock manure, such as liquid manure, guano etc. animal matter is often mixed with vegetable matter to refine the ratio between carbon and nitrogen.

The main role of organic inputs is to be used either as fertilizer for crops or as soil amendment. Fertilizers are used when the objective is to provide nutrients directly to the plant via the soil or by spraying whereas amendment is used when the objective is to improve the soil physical, chemical and biological properties.

List of organic inputs:

1. Farmyard manure
2. Green manures
3. Oil cakes
4. Leaf extract
5. Biogas slurry
6. Poultry manures.

How to use it

- This solution is actually very strong , we cannot spray it directly on the plants.
- We need to dilute this solution with water. After this, we will add 10tablespoons of this neem liquid to 1 litre of normal water and give a nice shower to plants.

Application:

- Neem extract is a liquid solution which is used as a pesticide or insecticide to control pests as well as insects which creates damage to the plants.
- It is not directly applied on the plants. First we mix the solution with water then use as spray on plants.

Question2. What is the price of Neem Extract in market?

Answer: Price is vary from company to company from 200 to 500 per 500ml .

Village Attachment Training Program Rural Agriculture Work Experience (RAWE) Animal Production Intervention Demonstration on Clean Milk Production

20-09-2023 to 26-09-2023

Introduction:

The dairy industry is an important segment of food industry in India as it plays a significant role in the national economy and socio-economic development of the country. It is an important source of self-employment and subsidiary occupation to the rural and semi-urban population of India. Milk provides relatively quick returns for small-scale livestock owners. It is a balanced, nutritious food and key element in household food security. Dairy industry is an integral part of livelihood of millions of people thriving on scarce resources.

Clean milk production:

Quality initiatives need to be made strong by introducing concept of clean milk production at the village level. "Clean milk" may be defined as milk drawn from the udder of healthy animals, which is collected in clean, dry milking pail and free from extraneous matter like dirt, dust, flies, hay, manure etc. clean milk has a normal milk flavor with low bacterial count and is safe for human consumption. Clean milk production is always beneficial/profitable for both the producers and the consumers because of the following reasons:

- Safe for human consumption.
- Better keeping quality and chances of spoilage minimized.
- High commercial value.
- Renders protection against disease like typhoid, dysentery, etc. which are transmitted to the milk through human contact.
- Helps to produce good quality dairy products or value-added products.

7. **Milk collection and transportation:** There should be a provision of bulk cooling tanks in order to reduce the bacteriological load in the milk immediately after collection.

Question asked by farmer:

Why should we use warm water?
To stimulate the animals for milking and also for the clean outer surface of teats.
Why knuckling is not suitable for milking?
It leads to damage to the tissue of teats due to which teat become small.

Conclusion:

Diary animal should be healthy and clean especially the hindquarter and udder. Hygienic practice at the time of milking and post milking handling of milk is important. Freshly drawn milk should be immediately cooled to 5°C within 4 hours. Housing of dairy animals should be designed to provide clean, dry, well ventilation, sufficient light and comfort environment.

Activity No. 08

Event type: - Workshop

Event Name: A Two-Day Workshop on Soft Skills for school students

Speaker: A.P. Narinder Singh (Department of English)

Date: 2nd and 3rd February 2024

No. Of participants: - 80

Description: A two-day workshop was conducted by the department for school students to enhance their soft skills in which 80 students from local schools participate actively. A.P. Narinder Singh encouraged the students how to use their soft skills in English language.

Impact: A soft skills workshop, "Enhancing Personal and Professional Effectiveness," equips participants with essential skills to improve communication, teamwork, and productivity. The workshop covers effective communication, teamwork and collaboration, time management and productivity, leadership and influence, emotional intelligence and well-being, and problem-solving and decision-making. Through expert lectures, interactive group work, role-playing exercises, case studies, and reflective journaling, participants develop skills to enhance their personal and professional lives. Key takeaways include improved communication, teamwork, productivity, leadership, emotional intelligence, and problem-solving abilities. The workshop is ideal for professionals, entrepreneurs, students, or anyone seeking to boost their soft skills. Upon completion, participants receive a certificate, enhancing their professional portfolio. By attending this workshop, individuals can excel in their careers, build stronger relationships, and achieve greater success.

Name of Activity : Creativity and Innovation

Date : February 6, 2024

Launch of NSD theme:

Resource person- Dr. Jatindersingh, Dr. Rishi

Students participated -47

On February 6, 2024, the Punjab State Council for Science and Technology, in collaboration with the Department of Science and Technology, launched National Science Day with the theme 'Indigenous Technologies for Viksit Bharat'. This significant event took place online, attracting a large audience including B.Sc. and M.Sc. students eager to delve into the realm of indigenous technologies. Dr. Jatinder Singh, the Head of the Science Department, graced the occasion with his presence alongside other esteemed faculty members. The event aimed to showcase the importance of indigenous technologies in fostering the development of a 'Viksit Bharat' or 'Developed India', emphasizing the need for self-reliance and innovation in scientific endeavors.

The impact of this event was profound and far-reaching. Firstly, it ignited a sense of curiosity and enthusiasm among students, encouraging them to explore indigenous technologies and their role in shaping the nation's future. By focusing on homegrown solutions, the event highlighted the potential for innovation and creativity within the country, inspiring students to contribute to India's scientific progress. Additionally, the emphasis on indigenous technologies underscored the importance of preserving and promoting traditional knowledge systems, bridging the gap between modern science and age-old practices. Moreover, the online format of the event allowed for broader participation and engagement, reaching students from various geographical locations and academic backgrounds. Overall, the launch of National Science Day with the theme 'Indigenous Technologies for Viksit Bharat' served as a catalyst for fostering a culture of innovation, self-reliance, and scientific inquiry among the youth, paving the way for a brighter and more sustainable future for India.

Activity No. 06

Name of Activity:

Presentation and Public Speaking Skills 1. Confidence –

Presentation and Public Speaking Skills to develop Confidence – (no. of participants = 65)

Resource Person (02)

1. Gagandeep Kaur (M.Sc.I Physics)
2. Babandeep Kaur (B.Sc.I Non-medical)

Students develop their confidence significantly through giving presentations, as this process challenges them to enhance both their public speaking and critical thinking abilities. Presenting in front of an audience encourages students to step outside their comfort zones and confront the fears associated with speaking in public. Initially, many students experience anxiety or nervousness at the thought of presenting, but by practicing regularly, they learn to manage these emotions and build greater self-assurance.

The process of preparing for a presentation is an essential factor in boosting confidence. Researching and organizing material requires students to deepen their understanding of the subject matter, which not only equips them with knowledge but also allows them to speak with greater authority. The more prepared they feel, the more confident they are likely to be when presenting. As they organize their ideas and structure their talk, students learn to communicate more effectively and make their content engaging, helping them develop a clearer sense of their own voice and capabilities.

Over time, consistent exposure to presentations helps students overcome initial fears and become more poised speakers. This growing comfort with public speaking not only increases their academic confidence but also prepares them for future professional settings, where communication and presentation skills are invaluable. As students gain more experience, they begin to approach future speaking engagements with greater ease and enthusiasm, further enhancing their overall confidence. Ultimately, giving presentations fosters a strong sense of accomplishment and self-assurance that extends beyond the classroom.

Powerpoint Presentations on Save Water (02)

1. Gagandeep Kaur (M.Sc.I Physics)
2. Babandeep Kaur (B.Sc.I Non-medical)

Save Water:

Water is the most basic need of everyone (human being, animals, plants and other microorganisms). Without water we cannot imagine our life. Each drop of water is a priceless resource. As W. H. Auden said, “Thousands have lived without love, not one without water.”

Now , why we need water conservation?

GURU NANAK COLLEGE BUDHLADA

Under the Management of Shiromani Gurdwara Parbandhak Committee, Sri Amritsar Sahib

NAAC ACCREDITED "A++" GRADE

Despite the fact that water makes up 71% of our planet, only 3% of it is fresh water. Only 1% of the 3% is reachable, with the remaining 2% being trapped in ice caps and glaciers. This means that 1% of all living things on Earth, including people, animals, and plants, must survive entirely on their own.

◦ The importance of water - water as we know is used in all activities for agricultural, it is a crucial source for the growth of plants and crops, for industrial purposes and for commercial purposes, as a mode of transportation, acts as a carrier of goods domestically and internationally and also as a hydropower for the production of electricity. Most importantly, water is useful to carry out all our daily tasks activities like drinking, cooking and cleaning etc.

It is quite disheartening to see the misuse of water. We misuse water heavily in households, industries and even in the agriculture field.

- In 2021, over 2 billion people live in water-stressed countries.
- In 2022, globally, at least 1.7 billion people use a drinking water source contaminated with faeces.

Microbiologically contaminated drinking water can transmit diseases such as diarrhoea, cholera, dysentery, typhoid and polio and is estimated to cause approximately 5,05,000 diarrhoeal deaths each year.

How we can save water?

- We may conserve water by preventing water leakages in our taps, hand pumps, water storage tanks etc.
- We should educate the children about water conservation.
- We should follow the latest agricultural methods and technology to avoid heavy water needs.
- Social media has a global reach. What is posted on social media is seen by millions. So, we should use social media for spreading awareness regarding water conservation.
- In fun parks, big malls and clubs, we have to ensure that water should not misuse.

Conclusion-

The drinkable water is quite low and if we continue to wastewater at the speed we do today, the day is not far when we will have to fight for water. No matter you are rich or poor; water is a necessity for you. It is not a single person's responsibility to save water. We should avoid the wastage of water only by joining hands.

I would just like to add that when you are thirsty, you do not search for any other beverage, but only for water.
